DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 9 and 10, "in which minimum friction values can be achieved" is recited. This recitation is indefinite since it is unclear as to what parameters are defined by "minimum friction values". Claim 5 is grammatically awkward and confusing, especially the last several lines. The recitation of "or" on line 4 renders the claim indefinite. In claim 6, the recitation of "or" on line 3 renders the claim indefinite. In claim 10, line 2, the recitation of "at least in a partial area of the housing extending in the working direction" is grammatically awkward. What defines this? How does an "area" extend in a working direction? Claim 11 is indefinite since "the partial area" on line 2 lacks proper antecedent basis.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3721

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 and 9, 10 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Harada et al. '466.

Harada et al. '466 discloses the percussion drill hammer as claimed comprising a hammer housing 1, 15, a handle device surrounding at least a portion of the housing and including a handle 2, 12, and a guide device including rolling elements 4 effective between the hammer housing and the handle device located laterally on the housing, as broadly claimed, and effecting a spring characteristic transverse to a working direction.

6. Claims 1, 2, 4, 9, 10, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by UK Patent Application '045.

UK Patent Application '045 discloses the percussion drill hammer as claimed comprising a hammer housing 11, a handle device including a handle 12, and a guide device including rolling elements 7 effective between the hammer housing and the handle device located laterally on the housing, as broadly claimed, and effecting a spring characteristic transverse to a working direction.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3721

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claims 5-8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harada et al. '466 or UK Patent Application '045 in view of Dunn '014

Harada et al. '466 and UK Patent Application '045 lack the specifically claimed rolling elements and tracks. Dunn '014 discloses a related reciprocating tool comprising a handle 12 guided reciprocably upon a tool member 11, 31, and a guide device including rolling members 30 in cooperating tracks 33, 32 between the handle and tool member. In view of the teachings of Dunn '014, it would have been obvious to one skilled in the art to provide the devices of Harada et al. '466 or UK Patent Application '045 with the specifically claimed rolling elements and tracks for the guide arrangement in order to more effectively guide the elements.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the attached PTO-892 for related art.

Art Unit: 3721

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott A. Smith whose telephone number is 571-272-4469. The examiner can normally be reached on 5:30-4:00 Tues.-Fri..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

S. Smith
